

EMPLOYMENT

Department of Biological Sciences, Purdue University

Irwin Tessman Assistant Professor

West Lafayette, Indiana

August 2025–Present

Channing Division of Network Medicine (CDNM)

Brigham and Women's Hospital, Harvard Medical School

Postdoctoral Research Fellow in Dr. Yang-Yu Liu's lab

Boston, Massachusetts

June 2021–May 2025

EDUCATION

University of Illinois Urbana-Champaign (UIUC)

Ph.D. in Physics, GPA: 3.97/4.00, Advisor: Dr. Sergei Maslov

Urbana, Illinois

August 2014–May 2021

- *Dissertation title*: “Modeling for microbial communities with cross-feeding and predator-prey interactions”
- *Committee*: Sergei Maslov, Ido Goldenberg, James O'Dwyer, and Nigel Goldenfeld (Chair)

University of Science and Technology of China (USTC)

B.S. in Applied Physics, *summa cum laude*, GPA: 3.98/4.30, Rank: 1/67

Hefei, Anhui

September 2010–June 2014

RESEARCH INTERESTS

My research seamlessly blends computational biology, microbiology, ecology, biophysics, and medicine to devise computational methods for complex biological systems. I develop **mathematical models and machine learning methods that integrate multi-omics data to explore diet-microbe-metabolite-disease relationships**, revealing their dynamics and connection to human health.

Our research group aims to create computational approaches for translational research. Our long-term goal is to formulate novel computational methods to design dietary, prebiotic, probiotic, and phage therapies by targeting gut microbiomes.

SCHOLARSHIPS AND AWARDS

- Irwin Tessman termed Assistant Professorship 2025-2028
- National University of Singapore Presidential Young Professorship (PYP), ~1.5M USD, offered & declined 2025
- Fondazione Internazionale Menarini “Artificial Intelligence and Network Medicine: Path to Precision Medicine” Program Scholarship 2024
- The Les Houches School of Physics “Evolution of Diversity” Program Scholarship 2018
- Guo Moruo Scholarship (the highest honor in USTC) 2014
- UCLA Cross-disciplinary Scholars in Science and Technology (CSST) Summer Research Scholarship 2013
- China National Scholarship 2012
- XinDi Scholarship 2011

TEACHING EXPERIENCE

- Lecture: “Food Polysaccharides”. Food Chemistry, FOOD-SCI 541, University of Massachusetts Amherst, March 2025
- Invited Lecture: “Regression Models – predicting metabolomic profiles of microbial communities as an example”. National University of Singapore, February 2025
- Lecture: “Electric Fields”. General Physics II, PHYS 114, Wake Forest University, January 2025
- Invited Lecture: “Application of Machine-Learning Methods in Biology and Medicine”. Summer School hosted by the School of Medicine, Peking University, July 2024
- Invited Lecture: “Application of Machine-Learning Methods in Biology and Medicine”. Summer School hosted by the School of Medicine, Peking University, July 2023
- Guest Lecture: “Regression Models – predicting metabolomic profiles of microbial communities as an example”. Microbiome Data Science, BIO/MIC 494/598, Arizona State University, March 2023
- Graduate Mentor: mentored two students in analyzing the microbiome data and modeling
- Teaching Assistant: Statistical Physics, UIUC PHYS 504, Spring 2017
- Teaching Assistant: Relativity & Math Applications, UIUC PHYS 225, Fall 2016
- Teaching Assistant: Classical Mechanics II, UIUC PHYS 326, Spring 2016
- Teaching Assistant: Classical Mechanics II, UIUC PHYS 326, Fall 2015
- Teaching Assistant: Quantum Mechanics II, UIUC PHYS 581, Spring 2015
- Teaching Assistant: Classical Mechanics II, UIUC PHYS 326, Fall 2014

INVITED TALKS

- Quantitative methods for microbiome research and precision nutrition. Oral presentation at the Center for Computational Life Sciences, Cleveland Clinic, Cleveland, OH, April 2025
- Quantitative methods for microbiome research and precision nutrition. Oral presentation at the Department of Biomedical Engineering, University of Connecticut, Storrs, CT, April 2025
- Computational methods for microbiome research and precision nutrition. Oral presentation at the Department of Medicine and Life Sciences, Universitat Pompeu Fabra, Barcelona, Spain, April 2025
- Quantitative methods for microbiome research and precision nutrition. Oral presentation at the Department of Food Science, University of Massachusetts Amherst, Amherst, MA, March 2025
- Computational methods for microbiome research and precision nutrition. Oral presentation at the Department of Biological Sciences, Purdue University, West Lafayette, IN, February 2025

- Quantitative methods for microbiome research and precision nutrition. Oral presentation at the Department of Nutritional Sciences, University of Oklahoma Health Sciences Center, Oklahoma City, OK, February 2025
- Quantitative methods for microbiome research and precision nutrition. Oral presentation at the Department of Biology, University of Texas at Arlington, Arlington, TX, February 2025
- Quantitative methods for microbiome research and precision nutrition. Oral presentation at the Synthetic Biology for Clinical and Technological Innovation (SynCTI), National University of Singapore, Singapore, February 2025
- Computational methods for microbiome research and precision nutrition. Virtual oral presentation at the Benioff Center for Microbiome Medicine, University of California, January 2025
- Quantitative methods for microbiome research and precision nutrition. Oral presentation at the Department of Physics, Wake Forest University, Winston-Salem, NC, January 2025
- Computational methods for microbiome research and precision nutrition. Virtual oral presentation at the Department of Computer Science and Engineering, University of Texas at Arlington, January 2025
- Predicting metabolic response to dietary intervention using deep learning. Virtual oral presentation at AI in Biomedicine, Keystone Symposia, May 2024
- Machine learning for precision nutrition. Virtual oral presentation at the Bio-Data Club Seminar, Moffitt Cancer Center, Tampa, FL, January 2024
- Machine learning for precision nutrition. Oral presentation at Circulating Metabolic Intermediates as Fuels and Signals Conference, Keystone Symposia, Salt Lake City, UT, October 2023
- Machine learning for precision nutrition. Oral presentation at the MIT Center for the Physics of Living Systems, Department of Physics, Massachusetts Institute of Technology, Boston, MA, April 2023
- Pairing metagenomics and metaproteomics to pinpoint ecological niches and metabolic essentiality of microbial communities. Oral virtual presentation at the International Workshop on Soft Matter and Biophysics theories, Institute of Theoretical Physics, Chinese Academy of Sciences, November 2022
- Pairing metagenomics and metaproteomics to pinpoint ecological niches and metabolic essentiality of microbial communities. Oral presentation at the MIT Center for the Physics of Living Systems, Department of Physics, Massachusetts Institute of Technology, Boston, MA, May 2022
- Pairing metagenomics and metaproteomics to pinpoint ecological niches and metabolic essentiality of microbial communities. Oral presentation at the School of Pharmaceutical Sciences, University of Ottawa, Ottawa, Canada, May 2022
- Predicting metabolomic profiles from microbial compositions through neural ordinary differential equations. Oral presentation at the Center for Complex Network Research, Northeastern University, Boston, MA, March 2022

CONTRIBUTED PRESENTATIONS

- Revealing the interactions between microbes, metabolites, and dietary compounds based on microbial genomes. Oral presentation at Microbial Communities, APS March Meeting, Los Angeles, CA, March 2025
- Machine learning for precision nutrition. Oral presentation at Cold Spring Harbor Laboratory Microbiome Meeting, Cold Spring Harbor, NY, October 2024
- Predicting metabolic response to dietary intervention using deep learning. Oral presentation at Microbial Communities, APS March Meeting 2024, Minneapolis, MN, March 2024
- Predicting metabolic response to dietary intervention using deep learning. Poster presentation at Microbial Ecology and Evolution Hub-based Conference 2024, Boston College, Boston, MA, January 2024
- Machine learning for precision nutrition. Poster presentation at IAIFI Summer Workshop, Northeastern University, Boston, MA, August 2023
- Microbiome-based correction of dietary assessment. Oral presentation at Health Professionals Follow-up Study meeting, Harvard Medical School, Boston, MA, May 2023
- Predicting metabolomic profiles from microbial compositions through neural ordinary differential equations. Poster presentation at MIT Microbiome Symposium, Massachusetts Institute of Technology, Boston, MA, April 2023

- Predicting metabolomic profiles from microbial composition through neural ordinary differential equations. Oral presentation at Microbial Communities, APS March Meeting 2023, Las Vegas, NV, March 2023
- Pinpointing ecological niches and metabolic essentiality of microbial communities using both metagenomics and metaproteomics. Oral presentation at Ecological and Evolutionary Biology, APS March Meeting 2022, Chicago, IL, March 2022
- Predicting metabolomic profiles from microbial composition through neural ordinary differential equations. Oral presentation at Channing Microbiome Meeting, Harvard Medical School, Boston, MA, February 2022
- Hitchhiking, collapse, and contingency in phage infections of migrating bacterial populations. Poster presentation at Biocomplexity Theme Review, Carl R. Woese Institute for Genomic Biology, Urbana, IL, October 2019
- CRISPR-induced Red Queen dynamics in the phage-microbial system. Poster presentation at Biocomplexity Theme Review, Carl R. Woese Institute for Genomic Biology, Urbana, IL, October 2019
- Evidence for a multi-level trophic organization of the human gut microbiome. Poster presentation at IGB Fellows Symposium, Carl R. Woese Institute for Genomic Biology, Urbana, IL, April 2019
- Thermodynamic constraints on cross-feeding in bacterial population. Oral presentation at Ecological and Evolutionary Biology, APS March Meeting 2019, Boston, MA, March 2019
- Hitchhiking, collapse, and contingency in phage infections of migrating bacterial populations. Poster presentation at the “Evolution of Diversity” Program, Les Houches Physics School, Les Houches, February 2018

PEER REVIEW

- Scientific Journals: Science, Cell, Nature Communications, PNAS, eLife, PloS Computational Biology, Biophysical Journal, Microbiology Spectrum, PloS One, BMC Medicine, Nutrients, Computational and Structural Biotechnology Journal, peerJ
- Grants: UKRI (United Kingdom Research and Innovation)
