

EMPLOYMENT

Channing Division of Network Medicine (CDNM)

Brigham and Women's Hospital, Harvard Medical School

Postdoctoral Research Fellow in Dr. Yang-Yu Liu's lab

Boston, Massachusetts

June 2021–Present

EDUCATION

University of Illinois Urbana-Champaign (UIUC)

Ph.D. in Physics, GPA: 3.97/4.00, Advisor: Dr. Sergei Maslov

Urbana, Illinois

August 2014–May 2021

- *Dissertation title*: “Modeling for microbial communities with cross-feeding and predator-prey interactions”
- *Committee*: Sergei Maslov, Ido Goldenring, James O'Dwyer, and Nigel Goldenfeld (Chair)

University of Science and Technology of China (USTC)

B.S. in Applied Physics, *summa cum laude*, GPA: 3.98/4.30, Rank: 1/67

Hefei, Anhui

September 2010–June 2014

RESEARCH

My research integrates biophysics, ecology, epidemiology, and machine learning to develop computational methods for complex biological systems. I focus on diet-microbiome-metabolite-disease relationships by modeling microbial communities and integrating multi-omics data to uncover the dynamics of these communities and their connection to human health. Key areas of my work include:

- Developing ecological models incorporating diverse mechanisms such as cross-feeding, predator-prey dynamics, trophic levels, exchange of essential nutrients, the diauxic shift, and thermodynamic constraints.
- Predicting metabolic profiles and responses based on microbial compositions and dietary intakes using machine learning and ecology-based models.
- Creating personalized predictions of metabolite concentrations and metabolic responses to dietary interventions.
- Analyzing network structures of gut microbes, dietary compounds, and metabolites.
- Enhancing multi-omics-based disease diagnostics.
- Exploring functional redundancy in microbial communities using metagenome and metaproteome.
- Investigating CRISPR-induced arms-race co-evolution between bacteria and viruses.
- Studying infection dynamics of viruses like phage P1 ν ir on chemotactic bacteria (e.g., *E. coli*).
- Developing agent-based models for COVID-19 infection and analyzing on-campus COVID case data for policymaking.

SCHOLARSHIPS AND AWARDS

- | | |
|--|------|
| • The Les Houches School of Physics “Evolution of Diversity” Program Scholarship | 2018 |
| • UCLA-CSST Summer Research Scholarship | 2013 |
| • Guo Moruo Scholarship (the highest honor in USTC) | 2013 |
| • China National Scholarship | 2012 |
| • XinDi Scholarship | 2011 |

FUNDING IN APPLICATION

- Pathway to Independence Award (K99/R00), The National Institutes of Health (NIH), resubmitted on July 2024 and waiting to be reviewed

PAST WORK EXPERIENCE

University of Ottawa Invited Visiting Scholar in Dr. Daniel Figey's lab	Ottawa, Canada May 2022
University of Illinois at Urbana-Champaign (UIUC) Research Assistant in Dr. Sergei Maslov's lab	Urbana, IL, USA January 2017–May 2021
Peking University Exchange Student in Dr. Chao Tang's lab	Beijing, China July 2017–August 2017
Niels Bohr Institute Visiting Scholar in Dr. Kim Sneppen's lab	Copenhagen, Denmark June 2017–July 2017

TEACHING EXPERIENCE

- Invited Lecture: “Application of Machine-Learning Methods in Biology and Medicine”. Summer School hosted by the School of Medicine, Peking University, July 2024
- Invited Lecture: “Application of Machine-Learning Methods in Biology and Medicine”. Summer School hosted by the School of Medicine, Peking University, July 2023
- Guest Lecture: “Regression Models – predicting metabolomic profiles of microbial communities as an example”. Microbiome Data Science, BIO/MIC 494/598, Arizona State University, March 2023
- Teaching Assistant: Statistical Physics, UIUC PHYS 504, Spring 2017
- Teaching Assistant: Relativity & Math Applications, UIUC PHYS 225, Fall 2016
- Teaching Assistant: Classical Mechanics II, UIUC PHYS 326, Spring 2016
- Teaching Assistant: Classical Mechanics II, UIUC PHYS 326, Fall 2015
- Teaching Assistant: Quantum Mechanics II, UIUC PHYS 581, Spring 2015
- Teaching Assistant: Classical Mechanics II, UIUC PHYS 326, Fall 2014

INVITED TALKS

- Predicting metabolic response to dietary intervention using deep learning. Virtual oral presentation at AI in Biomedicine, Keystone Symposia, May 2024
- Machine learning for precision nutrition. Virtual oral presentation at the Bio-Data Club Seminar, Moffitt Cancer Center, Tampa, FL, January 2024
- Machine learning for precision nutrition. Oral presentation at Circulating Metabolic Intermediates as Fuels and Signals Conference, Keystone Symposia, Salt Lake City, UT, October 2023
- Machine learning for precision nutrition. Oral presentation at the MIT Center for the Physics of Living Systems, Department of Physics, Massachusetts Institute of Technology, Boston, MA, April 2023
- Pairing metagenomics and metaproteomics to pinpoint ecological niches and metabolic essentiality of microbial communities. Oral virtual presentation at the International Workshop on Soft Matter and Biophysics theories, Institute of Theoretical Physics, Chinese Academy of Sciences, Beijing, November 2022
- Pairing metagenomics and metaproteomics to pinpoint ecological niches and metabolic essentiality of microbial communities. Oral presentation at the MIT Center for the Physics of Living Systems, Department of Physics, Massachusetts Institute of Technology, Boston, MA, May 2022

- Pairing metagenomics and metaproteomics to pinpoint ecological niches and metabolic essentiality of microbial communities. Oral presentation at the School of Pharmaceutical Sciences, University of Ottawa, Ottawa, May 2022
- Predicting metabolomic profiles from microbial compositions through neural ordinary differential equations. Oral presentation at the Center for Complex Network Research, Northeastern University, Boston, MA, March 2022

CONTRIBUTED PRESENTATIONS

- Predicting metabolic response to dietary intervention using deep learning. Oral presentation at Microbial Communities, APS March Meeting 2024, Minneapolis, MN, March 2024
- Predicting metabolic response to dietary intervention using deep learning. Poster presentation at Microbial Ecology and Evolution Hub-based Conference 2024, Boston College, Boston, MA, January 2024
- Machine learning for precision nutrition. Poster presentation at IAIFI Summer Workshop, Northeastern University, Boston, MA, August 2023
- Microbiome-based correction of dietary assessment. Oral presentation at Health Professionals Follow-up Study meeting, Harvard Medical School, Boston, MA, May 2023
- Predicting metabolomic profiles from microbial compositions through neural ordinary differential equations. Poster presentation at MIT Microbiome Symposium, Massachusetts Institute of Technology, Boston, MA, April 2023
- Predicting metabolomic profiles from microbial composition through neural ordinary differential equations. Oral presentation at Microbial Communities, APS March Meeting 2023, Las Vegas, NV, March 2023
- Pinpointing ecological niches and metabolic essentiality of microbial communities using both metagenomics and metaproteomics. Oral presentation at Ecological and Evolutionary Biology, APS March Meeting 2022, Chicago, IL, March 2022
- Predicting metabolomic profiles from microbial composition through neural ordinary differential equations. Oral presentation at Channing Microbiome Meeting, Harvard Medical School, Boston, MA, February 2022
- Hitchhiking, collapse, and contingency in phage infections of migrating bacterial populations. Poster presentation at Biocomplexity Theme Review, Carl R. Woese Institute for Genomic Biology, Urbana, IL, October 2019
- CRISPR-induced Red Queen dynamics in the phage-microbial system. Poster presentation at Biocomplexity Theme Review, Carl R. Woese Institute for Genomic Biology, Urbana, IL, October 2019
- Evidence for a multi-level trophic organization of the human gut microbiome. Poster presentation at IGB Fellows Symposium, Carl R. Woese Institute for Genomic Biology, Urbana, IL, April 2019
- Thermodynamic constraints on cross-feeding in bacterial population. Oral presentation at Ecological and Evolutionary Biology, APS March Meeting 2019, Boston, MA, March 2019
- Hitchhiking, collapse, and contingency in phage infections of migrating bacterial populations. Poster presentation at the “Evolution of Diversity” Program, Les Houches Physics School, Les Houches, February 2018

PEER REVIEW

- Scientific Journals: Science, Cell, Nature Communications, PNAS, eLife, PloS Computational Biology, Biophysical Journal, Microbiology Spectrum, PloS One, Nutrients, Computational and Structural Biotechnology Journal
- Grants: UKRI (United Kingdom Research and Innovation)

SKILLS

- Programming Languages: Python, R, Matlab, Julia, C, C++
- Machine Learning: PyTorch, TensorFlow, scikit-learn
- Languages: English (full professional proficiency), Chinese (native), Spanish (limited working proficiency)
- Other: Open MPI, Latex, Markdown, Illustrator, ChatGPT
